### Reservationless-Plus Web-enabled Conferencing

Looking to get more than just conversation out of your conference calls? Web-enabled conferencing from Reservationless-Plus<sup>SM</sup> adds the power of the Internet to your audio call.

Reservationless-Plus web-enabled conferencing turns your call into a web and audio-integrated experience that adds impact to your message, increases conference participation and puts you in control with a click of your mouse.

#### Reservationless-Plus Web-enabled Conferencing Allows You To:

- Keep track of who is on the call - both on the phone and on the web. You'll know exactly who's in attendance by referencing the web moderator's phone and web participant lists.
- Get instant feedback from participants on information presented with the Reservationless-Plus polling feature.
- Receive questions from participants and address them at an appropriate point during the call.
- Share a PowerPoint presentation with participants using the Reservationless-Plus web conferencing feature.
- Schedule your call and send an email notification to participants right from the website with the online scheduling and notification feature. Participants receive a Microsoft® Outlook VCS file that books the call in their calendar (available January 2006).
- Turn scheduling and notification into a point-and-click process by downloading your Microsoft® Outlook Contacts file into your Reservationless-Plus phone book.

#### Manage Your Conferences Like Never Before

It's so easy to get started - simply navigate your browser to [www.reservationless-plus.net](http://www.reservationless-plus.net). All you need to use this versatile service is your Reservationless-Plus Conference Code or Owner Number and your Chairperson/Leader PIN. From there you can:

- **Schedule** a Reservationless-Plus conference call and notify your participants of the details via email (available January 2006).
- **Monitor** and control a Reservationless-Plus conference call.
- **Edit** the default options for your Reservationless-Plus audio conference.
- **View and edit** information held on file for the Chairperson/Leader.
