 InterCall is a subsidiary
of West Corporation

AAP/EOE

Take advantage of the newest version of InterCall Unified Meeting today! As part of our on-going strategy to provide you with the most powerful way to bring people together from anywhere in the world—quickly, conveniently and, most important, easily, we have added functionality that will make your meetings even more productive.

To add these features to your account now, simply download the application from www.intercallapac.com/iумgo

Below you will find a brief description of the features now available so you can see for yourself what's new.

A New Look!

Check out the new look during your next meeting. This new look is displayed throughout the InterCall Unified Meeting user interface and Conference Manager.

Presentation Share

Show PowerPoint presentations “on the fly” directly from your computer with the benefit of user interface controls for easy management. No upload required! Presentation share also provides full animation and slide build support which helps makes your presentation more dynamic and effective.

Optional Presentation Upload mode still available.

Microsoft Office Communicator R2 2007 Support

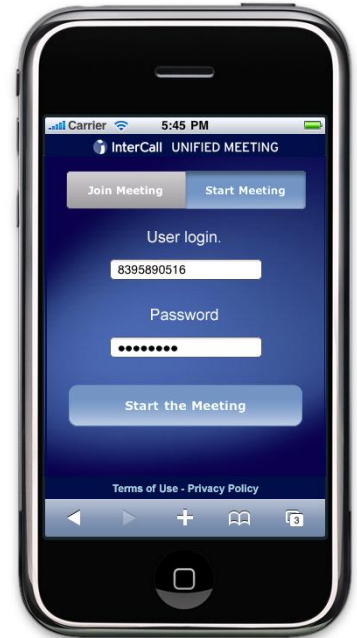

Instantly send meeting invites using tools already on your desktop! Microsoft Office Communicator 2007 R2 integration allows you to send a quick invite to an InterCall Unified Meeting using instant messenger.

iPhone Moderator Support

Join and manage audio meetings using your iPhone. **No download or app store purchase required.**

This browser based feature allows to you to easily manage audio participants while on the go. No need to be in front of your computer! Utilize online management features such as dial me, dial out, mute/unmute, chat and open/close meeting room door.

Q&A Mute All**

Manage an audio Q&A session on the web so all participants have an opportunity to ask a question. This function mutes all participants who can virtually raise their hand to speak in the meeting by pressing **#66** on their telephone keypad.

***Applicable to IICP platform only*

New Check for Updates Functionality

Take advantage of new features and functionality as soon as they are made available! This new feature automatically checks if an updated version of the meeting application is available for download. You can define the update interval using the taskbar icon.

Desktop Video

Updated meeting application includes major improvements to quality of desktop video. Add more impact to you meetings by letting participants see you online!

Post Conference Email

Attendee connection information can automatically be emailed to you after your meeting so you know how long participants were actually connected.

InterCall Unified Meeting usage is now included in the Reservationless-Plus post conference email. The usage details include participant names and/or phone numbers, time joined, time disconnected, duration, and connection type.

Sign up now via www-apac.intercallonline.com. Additional charges apply.
