With companies experiencing tight resources and budgets, it makes sense to work with vendors and partners who can take on the burden and cost of ownership that come with software and equipment that are critical to your business operations. That's why InterCall and our proprietary web conferencing product, InterCall Unified Meeting, are a smart choice.

By using InterCall Unified Meeting for your company's conferencing, you let us manage the software, equipment, development and maintenance so you can focus on your own systems and services.

Web Conferencing in a SaaS Environment

InterCall Unified Meeting lets you quickly and easily bring people together—from anywhere in the world—so they can see what you want to show them, hear what you have to say and interact in order to learn, collaborate and make decisions. You get audio, web and video conferencing in a single, proprietary system that integrates with everyday business tools, like calendaring systems and instant messaging clients, so starting and joining meetings is done just with a click of the mouse. The best part is that all of this comes as a service that InterCall manages for you.

Why is InterCall Unified Meeting well suited to a Software as a Service (SaaS) delivery model that your enterprise can use? Because of its quick deployment, no software or hardware purchases are necessary and there's no management or maintenance required. It is a hosted solution that can be accessed using a web browser and delivered from our media servers via a SaaS model that offers several benefits:

- + Top level security and system redundancy
- + 24x7 global support in 24 countries
- + Custom training delivered in-person or virtually
- + Comprehensive launch plans
- + Flexible and customizable
- + State-of-the-art infrastructure

InterCall has made (and continues to make) the investment in human resources to develop, deliver, support and maintain a superior quality web conferencing solution, so you can be confident in the product you are using for your business communications.

SaaS Benefits to the Enterprise

Organizations of all sizes—national or global—can truly benefit from the SaaS model. With InterCall Unified Meeting, we give your company more than just a web conferencing tool. Behind InterCall Unified Meeting, you get support, development and integration with InterCall's other systems and platforms.

ZERO SOFTWARE + ZERO HARDWARE + ZERO INVESTMENT = TOTAL SUCCESS

- + No hardware or software to buy
- + Product enhancements without cost or effort
- + Rapid set-up and deployment
- + Service accessible from any device, anywhere, anytime
- + Highly scalable
- + Strong reliability, performance and security
- + Around the clock support

Talk to your meeting consultant today to learn more about what SaaS can mean to your company and how InterCall Unified Meeting can save you time, money and resources while making your organization more productive.

“With the continuing globalization of business operations, organizations are increasingly looking to reduce their carbon footprints and travel cost. Here, web conferencing is a one shot solution.”
