## Text Messaging User Guide

### Technology Overview

InterCall's Text Messaging solution, has at its heart a browser-based application accessible from a user's personal computer enabling them to send messages to mobile contacts anywhere in the world. With organisational and personal address books available to each user, sending single or multiple messages is simplicity itself.

### Technical Requirements

InterCall's Text Messaging service has the following technical specifications and considerations:

- Hosted at [www.intercalltxt.com](http://www.intercalltxt.com)
- Internet Explorer v5+ required
- Maximum message length is 160 characters
- Flash and non-flash message types
- Administration account for access control
- Automatic user set-up
- Define user access and sending rights
- Global and personal address books
- Import contacts from your email application
- Automatically produced management reports

### How To Use Text Messaging

To start using InterCall Text Messaging, please follow these steps:

1. Point your browser to [www.intercalltxt.com](http://www.intercalltxt.com) or contact your account manager directly.
2. Click on the 'Sign Up Now' link.
3. Complete and submit the registration form.
4. We'll contact you to confirm details and activate your account.
5. You can then login and set-up your user accounts and contacts.
6. Start sending messages immediately.
7. If you require technical support please call +44(0)1452 556226.
